Michelle A. Sparks, Kevin W. Williams, Christine Lukacs, Andreas Schrell, Gregory Priebe, Andreas Spaltenstein and George M. Whitesides	1	Synthesis of potential inhibitors of hemagglutination by influenza virus: chemoenzymic preparation of N-5 analogs of *N*-acetylneuraminic acid
Yasunori Funabashi, Shigetoshi Tsubotani, Katsuo Koyama, Nozomi Katayama and Setsuo Harada	13	A new anti-MRSA dipeptide, TAN-1057 A
Paul Knochel and C. Janakiram Rao	29	Preparation and reactivity of functionalized alkenyl-zinc, -copper, and -chromium organometallics
Patrick Rocca, Francis Marsais, Alain Godard and Guy Quéguiner	49	Connection between metalation and cross-coupling strategies. A new convergent route to azacarbazoles
Georges Dewynter, Nourreddine Aouf, Marc Criton et Jean-Louis Montero	65	Synthèse de 'sulfahydantoïnes' chirales. Aspects stéréochimiques et protection régiospécifique
Nicole Langlois and Anne Rojas	77	A short synthesis of C-2 symmetric (2*S*,5*S*) pyrrolidine-2,5-dicarboxylic acid, a constituent of red alga *Schizymenia dubyi*
P. Boquel, C. Taillefumier, Y. Chapleur, P. Renaut, S. Samreth and F. D. Bellamy	83	Towards a new type of HMG-CoA reductase inhibitors—II. Dramatic substituents effects in the C-5 epimerisation of carbohydrate derivatives
Yun-Xing Cheng, Wei-Shan Zhou and Hou-Ming Wu	97	A novel rearrangement of 14-mesyloxy-*ent*-kaurenoids
Jeroni Morey and José M. Saá	105	Solid state redox chemistry of hydroquinones and quinones
Tirumalai R. Kasturi, Srirangam K. Jayaram, Palle V. P. Pragnacharyulu, Jitendra A. Sattigeri, Gowravaram M. Reddy and Kaipenchery A. Kumar	113	Reaction of spironaphthalenones with hydroxylamine—I. A reinvestigation of the mechanism
Tirumalai R. Kasturi, Kaipenchery A. Kumar and Palle V. P. Pragnacharyulu	125	Reaction of spironaphthalenones with hydroxylamine—II. Structure of product in the reaction of 1'-substituted spironaphthalenone
Tirumalai R. Kasturi, Kaipenchery A. Kumar, Palle V. P. Pragnacharyulu and Gundi Sridevi	135	Reaction of spironaphthalenones with hydroxylamine—III. A novel mechanism for the formation of products and trapping of an intermediate

Alejandro F. Barrero, Juan E. Oltra, María M. Herrador, Eduardo Cabrera, Juan F. Sanchez, José F. Quílez, Francisco J. Rojas and José F. Reyes	141	Gibepyrones: α-pyrones from *Gibberella fujikuroi*
David St. C. Black, Paul A. Keller and Naresh Kumar	151	Synthesis of pyrrolophenanthridones by aryl–aryl coupling reactions
Peter J. Garratt, Simon N. Thorn and Roger Wrigglesworth	165	Synthesis of 1,2,4-triazoles and 1,2,4,6-tetraazabicyclo[3.3.0]octanes from diphenyl cyanocarbonimidate. Competition between addition of hydrazines to esters or nitriles
Richard J. Mears and Andrew Whiting	177	β-Boronate carbonyl derivatives: synthesis and evidence for the intervention of boronate 'ate'-complexes in enolate alkylations
Anthony D. M. Curtis, Richard J. Mears and Andrew Whiting	187	The origin of the stereoselectivity in the aldol reactions of β-boronate carbonyl derivatives
Franco Bellesia, Monica Boni, Franco Ghelfi and Ugo M. Pagnoni	199	α-Chloromercaptals from α-chloroacetals and thiols
Barry J. Bunn, Paul J. Cox and Nigel S. Simpkins	207	Enantioselective deprotonation of 8-oxabicyclo[3.2.1]octan-3-one systems using homochiral lithium amide bases
G. Bryon Gill and Muhammad S. Hj. Idris	219	Thermal ene reactions of alloxan and 1,3-dimethylalloxan
Carlo Dell'Erba, Marino Novi, Giovanni Petrillo and Cinzia Tavani	235	α-Arylation versus α-arylhydrazonylation of alkyl aryl ketones with arylazo *tert*-butyl sulfides
M. Carmen Cano, Fernando Gómez-Contreras, Ana M. Sanz and María J. R. Yunta	243	The steric course of some electrophilic additions to the tetrahydropyridazine ring moiety of benzo[*g*]phthalazino[1,2-*b*]pyridazine-6,13-dione derivatives—I
Bansi Lal and Ramesh M. Gidwani	255	Applications of a novel carbon–nitrogen bond cleavage reaction—I. A new synthesis/derivatisation of 5*H*-indeno[1,2-*d*]pyrimidines and pyrimido[6,1-*a*]isoindoles
X. L. Armesto, M. Canle L. and J. A. Santaballa	275	α-Amino acids chlorination in aqueous media
Mihály T. Beck, Zoltán Dinya, Sándor Kéki and Lajos Papp	285	Formation of C_{60} and polycyclic aromatic hydrocarbons upon electric discharges in liquid toluene

I Instructions to Contributors

TETRAHEDRON: Instructions to Contributors

For full instructions see issue 1 of this volume.

Tetrahedron seeks to publish experimental or theoretical research results of outstanding significance and timeliness in the field of Organic Chemistry, Bio-organic Chemistry and related disciplines. Publications may be in the form of Articles, Reports, or Symposia-in-Print. In order to achieve rapid publication, all contributions to this journal are reproduced directly from the author's typescript.

ARTICLES

Articles for Tetrahedron should describe original research in organic chemistry of high quality and timeliness. Because of restrictions on the size of the journal, priority will be given to those contributions describing scientific work having as broad appeal as possible to the diverse readership. We ask referees to help in the selection of articles which have this breadth and suggest that papers covering narrower aspects of the field be sent to journals specializing in those areas. It is strongly recommended that articles be written in English.

REPORTS

These are specially commissioned critical reports reviewing research results of topical importance. Such articles, published only in English, are commissioned in appropriate fields by the Editors of Tetrahedron Reports.

SYMPOSIA-IN-PRINT

These comprise collections of original research papers (including experimental sections) covering timely areas of organic chemistry. Topics for forthcoming Symposia are announced in the journal from time to time. A Guest Editor will invite authors active in the field to submit papers which are then reviewed and processed for publication by the Guest Editor under the usual refereeing system. Opportunity is also provided for other active investigators to submit contributions. These Symposia are published in English.

MANUSCRIPT PREPARATION

Manuscripts should be typed in 1.25 or 1.5 line spacing in black ink on good quality white bond paper. Either US Letter size paper (21.6 x 27.9 cm, 8.5 x 11 in) or A4 size paper (21.0 x 29.7 cm, 8.3 x 11.6 in) is acceptable. *For papers composed on a word processor, letter quality printers, but not dot matrix printers, should be used.* Xerox or other machine copy typescript may be used if the reproduction is rendered in crisp, clear black and white tones. The title should be in bold, centred on the width of the page at least 2 cm from the top of the page, with the initial letter of each major word capitalized. After two lines of space, the authors' names and addresses should be provided on separate lines. The author or authors to whom correspondence should be addressed by readers of the Journal should be indicated by an asterisk. Authors must include a short abstract in English of approximately three lines typed in single spacing. This should appear immediately after the address and before the commencement of the article. The typing area of page 1, including the title, should be 18.75 cm wide by 24 cm deep. The typing area of all other pages should be extended to cover an area 18.75 cm wide by approximately 26 cm deep. Articles should be an even number of pages which should be numbered in blue pencil on a front corner of each page.

REFERENCES

References to the literature should follow the format outlined in the Journal of the American Chemical Society.

1. Doe, J. S.; Smith, J.; Roe, P. *J. Am. Chem. Soc.* **1968,** *90,* 8234–8265.

GRAPHICAL ABSTRACTS

Authors are requested to supply a graphical abstract in triplicate in finished, camera-ready form at the time the article is first submitted. These abstracts should aim at presenting the essence of the article in a concise, pictorial form. Carefully drawn structural formulae are desired which serve to illustrate the theme of the paper. Appropriate text should be incorporated, not to exceed the space limitations (5 x 19.5 cm). In publication, abstracts will be reduced by 25%.

CAMERA-READY REQUIREMENTS. FORMULAS AND TABLES

To maintain a finished, artistic appearance of the journal, authors are asked to use whatever resources are available to them to produce manuscripts of pleasing appearance. Direct reproduction of camera-ready papers requires the author to provide the manuscript in a finished artistic format, making the best possible use of the space within an even number of completely utilized pages. Manuscripts may be cut and pasted, with tables and formulas placed appropriately within the manuscript. Formulas and other graphical material should be drawn with special care and pasted up exactly as the page is to appear in the journal, avoiding freehand illustration. The size of formulas may vary according to the nature of the illustrations but these should neither be overpowering nor so small that they are hard to read after reduction by a factor of 25%. *Regional Editors may return otherwise acceptable papers for modification if the quality of the figures or structural formulas is poor or the overall layout is carelessly composed.*

If authors have problems in the preparation of their manuscripts such as allocation of space, reproduction of formulas, charts or tables, they may contact members of the Board of Editors for advice.

HAZARDOUS COMPOUNDS
Authors are encouraged to draw attention to hazards by adding the word CAUTION followed by a brief descriptive phrase and literature reference if appropriate.

TRADEMARKS
Authors are required to acknowledge trademark protection in the standard fashion, e.g. Selectride®, Exaltrolide® (although not for words which have entered general usage: pyrex, etc.).

ORGANIC CHEMISTRY NOMENCLATURE
Authors will find the following a useful reference book for recommended nomenclature: *IUPAC Nomenclature of Organic Chemistry* ('The Blue Book'), edited by J. Rigaudy and S. P. Klesney, Pergamon Press, Oxford, 1979.

REFEREEING PROCESS
All papers are submitted to referees who advise the Editors on the matter of acceptance in accordance with the high standards required, on the understanding that the subject matter has not been previously published. Authors must accept full responsibility for the factual accuracy of the data presented and should obtain any necessary authority to publish. Referees' names are not disclosed but their views are forwarded by the Editors to the authors for consideration. Papers are accepted subject to editorial amendment as necessary. Authors are encouraged to suggest names of several experts in the field when papers are first submitted or at any time in the evaluation process.

REPRINTS
Any reprints required (above the 100 free) for directly reproduced manuscripts must be indicated on submission.

LANGUAGE OF PUBLICATION
The Board of Editors strongly recommends that Tetrahedron Papers be in English, but papers in French and German will be considered. Tetrahedron reports and Symposia papers must be in English.

X-RAY CRYSTALLOGRAPHIC DATA
Manuscripts reporting X-ray Crystallograhic data must be accompanied by lists of refined coordinates and bond distances with esd's for deposition at the Cambridge Crystallographic Data Centre [see Notice to Authors, *Tetrahedron* **40**(2), ii, (1984)].

CHARACTERIZATION OF NEW COMPOUNDS
All new compounds should be fully chracterized with relevant spectroscopic data. Microanalytical data should be included whenever possible.

MAILING OF MANUSCRIPTS
Manuscripts and Graphical Abstracts should be sent in triplicate directly to the Regional Editor for the particular area as given below. Papers sent to other Regional Editors will be forwarded for refereeing to the appropriate Editor as determined by the address of the author to whom the correspondence should be sent (who should be indicated by an asterisk).

TETRAHEDRON

STATEMENT ON THE US COPYRIGHT LAW FOR EDITORS, AUTHORS AND CONTRIBUTORS

The US Copyright Law (1978) has necessitated some changes regarding the assignment of copyright of articles published by **ELSEVIER SCIENCE LTD.** Although the author, editor or Publisher may not be in the USA a substantial proportion of the subscribers operate under US law. To provide protection and lawfully to permit traditional information distribution it is therefore desirable that authors from all countries should transfer copyright to the Publisher.

Amongst the principal changes brought about by the new law are the following:

1. Before the enactment of the new law, transfer of copyright was assumed to be implicit in the process of submitting a manuscript and its acceptance for publication. The new law vests statutory copyright in each article with the authors (or their employers) and the copyright can only be transferred in a formal written manner.

2. A copyright notice printed in the journal was taken to apply to the journal issue as a whole and to the articles individually. The new law requires a copyright notice to be published on the first page of each article for which copyright is claimed.

3. A much more rigorous definition of the conditions under which libraries and others may make photographic copies. Individuals and non-profit libraries will still be free to make copies of articles for research and teaching but severe restrictions have been placed on copying by commercial libraries and microfilm services who will have to obtain authorization from the copyright holder.

Traditionally the Publisher has been able to provide services in addition to the printed version of the journal, for example, offprints of separate articles, reprints of complete issues, microfilm editions, etc. He has also been able to authorize reproductions, reprinting and copying, make arrangements with indexing and abstracting services, and negotiate translation rights.

Such activities are now controlled by the need to obtain written permission from the copyright holder for every individual article involved.

It is therefore clearly in the interests of the maximum diffusion of knowledge for the Publisher to be in a position to continue these activities. We are therefore asking authors to transfer copyright to us by signing the Transfer of Copyright Form reproduced overleaf and sending it to the Publisher. Should the manuscript not be accepted, the form will be returned together with your paper.

Provision is made on the form for work performed for the United States Government (which is not subject to Copyright restrictions). If copyright is held by an employer an authorized representative of the company should sign the form.

Authors or their employers will continue to hold all proprietary rights including patent rights, and, of course, the right to make use of the article, as well as to grant permission for reproduction of tables, charts, illustrations etc.

To help libraries to obtain permission for copying (outside the fair use provisions) we have joined the Copyright Clearance Center. A note regarding this will appear inside the front cover of the journal.

NOTE: AUTHORS/COPYRIGHT HOLDERS ARE ASKED TO COMPLETE THIS FORM, SIGNING SECTION A, B OR C, AND MAIL IT TO THE PUBLISHERS WITH THE MANUSCRIPT OR AS SOON AFTERWARDS AS POSSIBLE.

BIOORGANIC & MEDICINAL CHEMISTRY LETTERS

A Tetrahedron Publication for Rapid Dissemination of Preliminary Communications on all Aspects of Bioorganic Chemistry, Medicinal Chemistry and Related Disciplines

Editor-in-Chief: **Dale L. Boger**, *Department of Chemistry, The Scripps Research Institute, 10666 North Torrey Pines Road, La Jolla, California 92037, USA*
Consulting Editors: **Richard H. Holm**, *Department of Chemistry, Harvard University, 12 Oxford Street, Cambridge, Massachusetts 02138, USA*, **Jaqueline K. Barton**, *Division of Chemistry and Chemical Engineering, California Institiute of Technology, Pasadena, California 91125, USA*, **Harry B. Gray**, *Division of Chemistry and Chemical Engineering, California Institute of Technology, Pasadena, California 91125, USA* and **James P. Collman**, *Department of Chemistry, Stanford University, Stanford, California 94305, USA*

(00972)
Subscription Rate 1994: Volume 4 (24 issues) **£ 485.00 (US$745.00)**
ISSN 0960-894X

Audience: Chemists, Medicinal Chemists, Pharmacologists, Biochemists, Molecular Biologists.

AIMS AND SCOPE
Bioorganic & Medicinal Chemistry Letters presents preliminary experimental or theoretical research results of outstanding significance and timeliness on all aspects of science at the interface of chemistry and biology and on major advances in drug design and development. The journal publishes preliminary communications in camera-ready form in much the same format as *Tetrahedron Letters* and strives to provide maximum dissemination to a large, international audience, the outstanding advances in bioorganic chemistry, medicinal chemistry and related disciplines.

A Selection of Papers
D.P. DUMAS, T. KAJIMOTO, K.K.-C. LIU, C.-H. WONG, D.B. BERKOWITZ, S.J. DANISHEFSKY (USA), Azasugar and glycal inhibitors of α-*L*-fucosidase.
F.M. RAUSHEL, B.W. MILES, L.E. POST, D.J. POST (USA), Mutational analysis of two putative domains within the large subunit of carbamoyl phosphate synthetase from *Escherichia coli*.
J.E. BALDWIN, J.M. BLACKBURN, R.J. HEATH, J.D. SUTHERLAND (UK), High-level soluble expression and purification of deacetoxycephalosporin C/deacetylcephalosporin C synthase.
J.E. BALDWIN, R.M. ADLINGTON, N.P. CROUCH, R.J. HEATH, I.A.C. PEREIRA, J.D. SUTHERLAND (UK), Substrate specificity of soluble recombinant deacetoxycephalosporin C/deacetylcephalosporin C synthase.
G. LI, W.C. STILL (USA), Dipeptidic ammonium ion binding by a synthetic receptor.
Y. FUKUDA, K. NAKATANI, S. TERASHIMA (Japan), Synthesis and cytotoxicity of enantiomeric pairs of duocarmycin A and its 2-epimer.
D.L. BOGER, W. YUN, P.A. KITOS, Q. JIN (USA), **S. TERASHIMA, Y. FUKUDA, K. NAKATANI** (Japan), DNA Alkylation properties of the duocarmycins: (+)-duocarmycin A, *epi*-(+)-duocarmycin A, *ent*-(–)-duocarmycin A and *epi*,*ent*-(–)-duocarmycin A.
A.P. KOZIKOWSKI, A.H. FAUQ, J.H. MILLER, M. MCKINNEY (USA), Alzheimer's therapy: an approach to novel muscarinic ligands based upon the naturally occurring alkaloid himbacine.
J. LIGHT, R.A. LERNER (USA), Phophabs: antibody–phage–alkaline phosphatase conjugates for one step ELISA's without immunization.
K.C. NICOLAOU, W.-M. DAI, S.-C. TSAY, W. WRASIDLO (USA), On the mechanism of activation of designed enediynes with selective cytotoxicity.
R.E. KILKUSKIE, Y. KASHIWADA, G. NONAKA, I. NISHIOKA, A.J. BODNER, Y.-C. CHENG, K.-H. LEE (USA), HIV and reverse transcriptase inhibition by tannins.
S. LIU, M.S. WOLFE, C. YUAN, S.M. ALI, R.T. BORCHARDT (USA), Synthesis and evaluation of 4',5'-dehydro-5'-fluoroaristeromycins as S-adenosyl-*L*-homocysteine (AdoHcy) hydrolase inhibitors.
